

brake master cylinders

1248-H/1260-H
4408 Series

Brake Master Cylinders are one of the most frequently specified units in aviation. These rugged units feature virtually trouble-free service, and few wearing parts — provide dependable braking action for a number of general aviation aircraft.

Standard equipment on Piper and other private aircraft for many years, the Brake Master Cylinders are available in the left- and right-hand models required by most aircraft.
